

ISOPACHS—Showing thickness of coal, in feet. Long dashed where inferred, short dashed where projected above land surface. Isopach interval 1 foot. Hachures indicate an area of local thinning of coal bed.

8.5
O

DRILL HOLE—Showing thickness of coal, in feet. Drill holes which do not intersect the coal or from which a coal thickness could not be determined are not shown.

4.4
▲

POINT OF MEASUREMENT—Showing total thickness of MCZ2 coal, in feet. Includes all points of measurement other than drill holes.

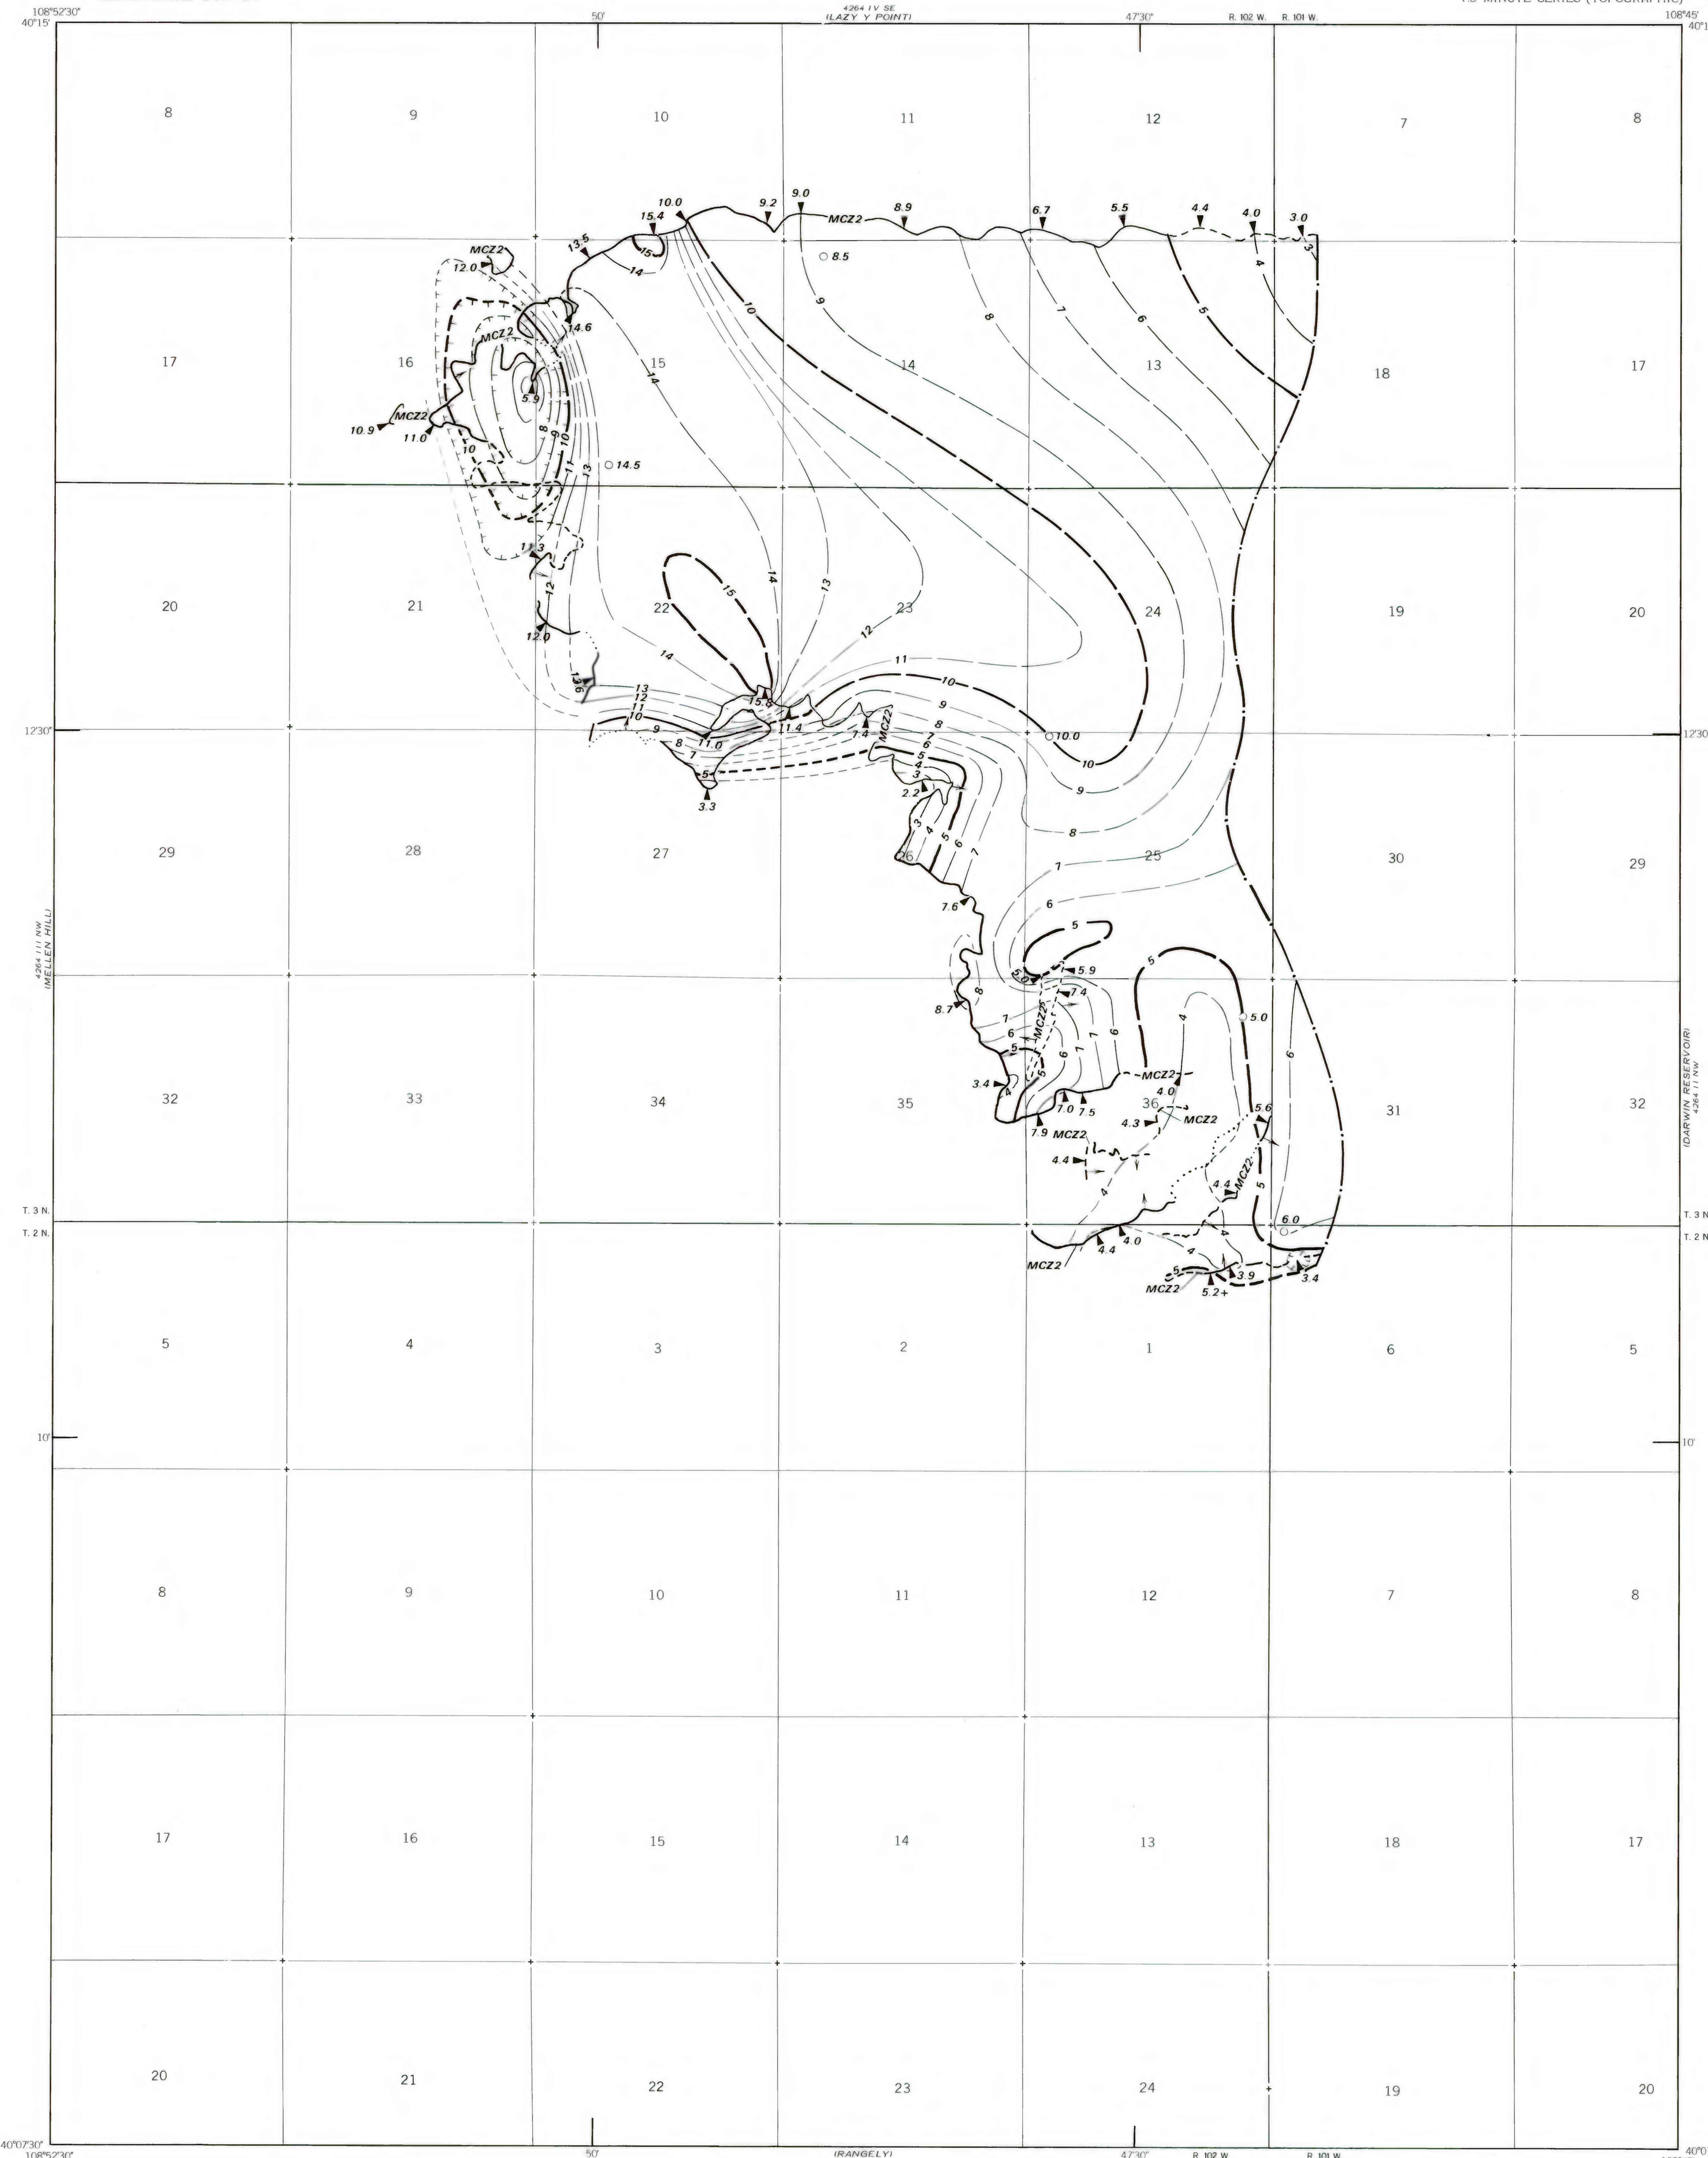

TRACE OF COAL BED OUTCROP—Showing symbol of name of coal bed. Arrow points toward coal-bearing area. Dashed where inferred by present authors.

BURNED AND CLINKERED COAL BOUNDARY—Dotted line indicates the inferred limit of burning. Arrow points toward area of unburned coal.

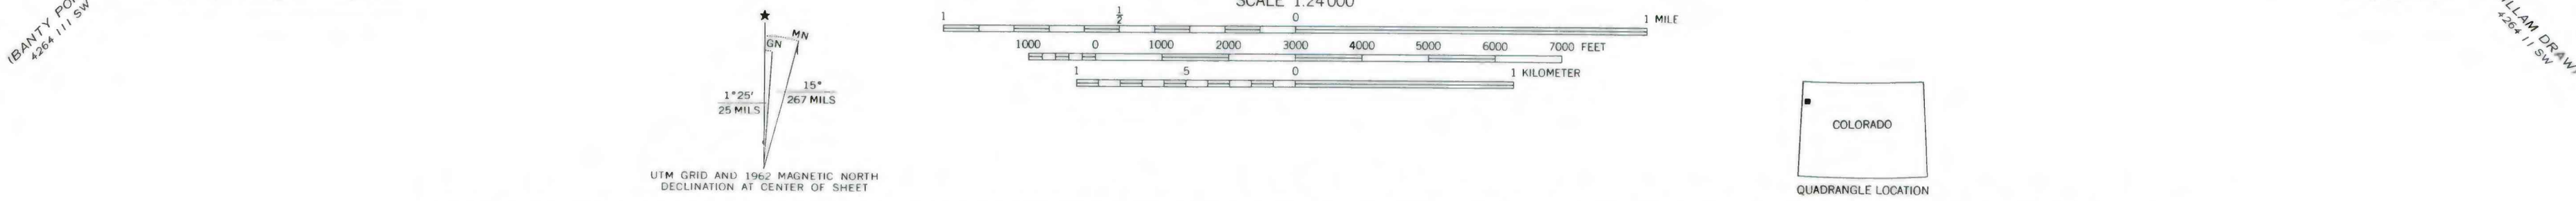

INSUFFICIENT DATA LINE—Coal thickness cannot be determined beyond line shown because of insufficient data.

To convert feet to meters, multiply feet by 0.3048.

Base from U.S. Geological Survey, 1962
